

Fractions Greater than 1

A **proper fraction** is where the numerator is **LESS** than the denominator.

$$\frac{3}{4}$$

number of parts we are interested in

number of equal parts in one whole

An **improper fraction** is where the numerator is **GREATER** than the denominator.

$$\frac{11}{4}$$

number of parts we are interested in

number of equal parts in one whole

A **mixed number** has an integer (whole number) and a proper fraction.

number of complete wholes

$$2$$

$$\frac{3}{4}$$

number of parts we are interested in

number of equal parts in one whole

Fractions Greater than 1

Mixed numbers

Improper fractions

$$1\frac{3}{4}$$

$$\frac{7}{4}$$

$$2\frac{1}{3}$$

$$\frac{7}{3}$$

$$1\frac{2}{5}$$

$$\frac{7}{5}$$

$$3\frac{5}{6}$$

$$\frac{23}{6}$$
